

A FRAME TROLLEY

BOSCOTEK™ A Frame Trolleys are the ideal solution to organised mobile tool storage. It's no secret the leaner and more efficient your workshop production is, the greater chances are of a more profitable business. Successful industrial workshops in the automotive, defence and manufacturing industries are adopting a '5S' approach to their production processes. **BOSCOTEK™** products are perfectly matched with this strategic way of operating which is why we have introduced our new VTS range of workshop storage products. Our Visual Tool Storage (VTS) range combines flexible tool and part storage with maximum visibility. This visibility is critical in a busy workshop; reducing excessive movement and time when employees try to locate and access tools. Also, the additional security benefit of knowing what tools are in use and what needs to be replaced is popular among training centres with a high user turnover. So start Reclaiming Your Workspace with a **BOSCOTEK** A Frame Trolleys.

	Height	Width	Depth	Usable height
BTAFT.1970.780	1970mm	780mm	600mm	1800mm
BTAFT.1970.1230	1970mm	1230mm	600mm	1800mm
