

MOBILE FLIGHT LINE CABINET

BOSCOTEK™ Flight Line Cabinets are the ideal solution to organised mass mobile tool storage. Historically, these cabinets have been featured within the aviation industry, where large volumes of precision tools and instruments were required to be stored together and in a dust resistant environment.

Today, more industries, including military and automotive workshops, are adopting this flexible approach to tool storage. Boscotek Flight Line Tool Cabinets are feature packed and come with the latest design in clear polycarbonate roller shutters. With a modern appearance and counter balanced door, the roller shutter uses a polycarbonate joining system as opposed to aluminium, providing clearer vision of tools and instruments being stored. So start Reclaiming Your Workspace with a BOSCOTEK Flight Line Cabinet.

| DIMENSIONS | Height | Width | Depth |
|----------------|----------|----------|--------|
| FLIGHT CABINET | 2,570 mm | 2,020 mm | 755 mm |
